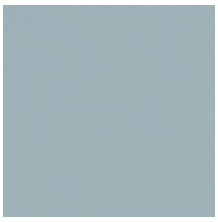
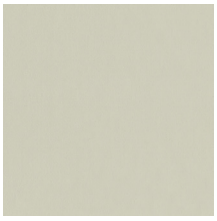
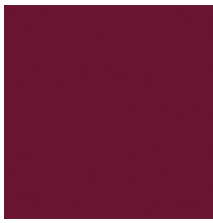
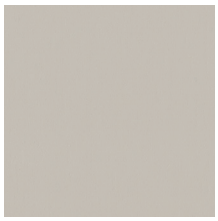
STYLE FOR MILES









Siteline™
CABINETRY

WELCOME TO SITELINE

SEE MORE. LEARN MORE. GET MORE.

When shopping for your new cabinets, we know it can feel a bit overwhelming. So many details, so many choices, so much potential confusion. With the assistance of our local, authorized Siteline dealers, we are here to help.

At Siteline, we deliver what you envision for your new kitchen, bath, mudroom, closet or laundry area. With a variety of style, material and finish/color choices, you can personalize new spaces to exactly your taste. We also offer a broad selection of interior options that customize your storage, fitting your unique needs.

By partnering with our local dealer experts, we bring our Siteline cabinets to your home knowing that we can deliver quickly, minimizing down time and reducing your stress during the mess.
We invite you to see more, learn more and get more with Siteline.

DECORATIVE LAMINATES

COLORFUL. DURABLE. MODERN.

THERMALLY FUSED LAMINATES

Thermally Fused Laminate (TFL) cabinet doors and drawer fronts are designed for durability, featuring an outer layer that resists chips, scratches and dents. Our 12 TFL choices, available in matte and textured woodgrains are easy to clean. TFL doors and drawer fronts are made with a medium density fiberboard core, featuring a durable, thermally-fused decorative overlay coating.

THERMOFOILS

Thermofoil styles are designed for the heavy-duty kitchen, bath or other room. Our selection of 10 Thermofoil choices range from high gloss colors, to solid and super matte colors, as well as textured and woodgrain matte options. Thermofoil styles are created with a heat-sealed polymer that forms over the carefully selected medium density fiberboard, providing a smooth surface, durability for daily wear and tear, and excellent stability.

WOOD CHOICES

TIMELESS. NATURAL. ENDURING.

ALDER

Perfect for a wide range of themes, medium density Alder has a fine, flowing grain pattern and naturally warm coloration. Alder can create both charm and drama in your home, and is ideal for drier climates. Infrequent, tight knots and pin holes are a part of the natural look of Alder. Available with 23 stains and glazes, and a clear finish option.

CHERRY

A luxurious choice for your home, moderately hard Cherry features warm color variation, which mellows with age adding character and grace. Cherry will vary from a light vanilla color to deep pink in its raw state, and become more red or copper in color when exposed to light. Pin holes, mineral streaks and sapwood are a part of the natural look of Cherry. Available with 23 stains and glazes, and a clear finish.

MAPLE

For a décor with minimal texture, Maple offers the beauty of a strong hardwood, featuring a more uniform appearance and tighter grain pattern. Mineral streaks are part of the natural look of Maple, varying in size and quantity, and appearing darker when stained. Maple styles will gradually amber or yellow over time. Available with seven stains and glazes, and a clear finish.

RED OAK

An enduring hardwood, Red Oak features sweeping flame-like grain patterns and distinctive texture. Red Oak is ideal for traditional and transitional rooms. Some darker mineral streaks are common in furniture quality Red Oak. Available with 23 stains and glazes, and a clear finish.

WOOD STAIN+GLAZE CHOICES

ALDER

Siteline stains are designed to complement, not hide, the natural beauty of wood grains. Stains add color and highlights to blend, not mute the character of your chosen wood.

PAINT CHOICES

Siteline painted finishes are designed to ensure color consistency and durability for your home. Our painted finishes are comprised of pigment layers to create consistency of color, depth of finish, luster and long-term durability. It is important to understand that all woods lose and gain moisture over time, which results in shrinkage or expansion. Because durability requires hardness, stress lines can appear in painted cabinetry at the corners of doors and at cabinet joints. These lines will be magnified by painted finishes but do not affect the durability.

ACRYLIC CHOICES + STYLES

VIBRANT. GLAMOROUS. CHIC.

If your kitchen or bath needs a little spicing up, perhaps an Acrylic finish is just the fix. Perfect as an accent or for the whole room, Acrylics are polymer high gloss, durable finishes applied to carefully selected medium density fiberboard for maximum color clarity and consistency. Our Acrylics feature a co-extruded polymer top layer which maximizes scratch resistance. Available in five high gloss choices.

DECORATIVE VENEER CHOICES

EXPRESSIVE. DISTINCT. REFINED.

DOMESTIC VENEER

Domestic Veneers are created from slices of wood, showcasing variations of weather, soil content and growing seasons of the natural habitat. Slicing for our flat cut Domestic Veneers is done parallel to a line through the center of the log, the result is a combination of cathedral and straight grain patterns. Flat cut veneers are most often used to produce high quality architectural millwork, and are applied to medium density fiberboard. Domestic Veneers are not grain-flow-matched on doors and drawer fronts. Available in four fashionable options, and a variety of finishes. Consult your authorized Siteline dealer for more information.

Alder Flat Cut

Cherry Flat Cut

Maple Flat Cut

Red Oak Flat Cut

RECONSTITUTED VENEER

Reconstituted Veneers are high quality, re-engineered wood products made from fast-growing trees, harvested from environmentally managed forests in Africa, and supplemented with plantation-grown Poplar from Italy. The logs are trimmed, sawn to length, peeled and dried, then the veneer is dyed to produce the desired color. The dyed veneer is glued, stacked and pressed into large rectangular blocks which are sliced at precise angles to produce the desired grain patterns, then applied to medium density fiberboard. As with fabric, Reconstituted Veneers have dye lot differences in color and graining which is normal. The veneer is not grain-flow-matched on doors and drawer fronts. Available in six upscale options. Consult your authorized Siteline dealer for more information.
